# Integrating IDA

Managing challenges  
and avoiding pitfalls

September 2014

To implement a user-led **federated identity** approach.

Establish a cross-HMG Identity **platform**.

Create a **marketplace** of identity suppliers

Create a **collaborative** identity **ecosystem** made up of users, industry and government.

1. Identity Assurance
2. Integrating with GOV.UK Verify
3. DVLA View Driving Licence
4. Defra Common Agricultural Policy

GDS:

- Manages central funding and procurement
- Develops and publishes standards
- Is building and running the hub
- Provides Document Checking Services

## IDA Design

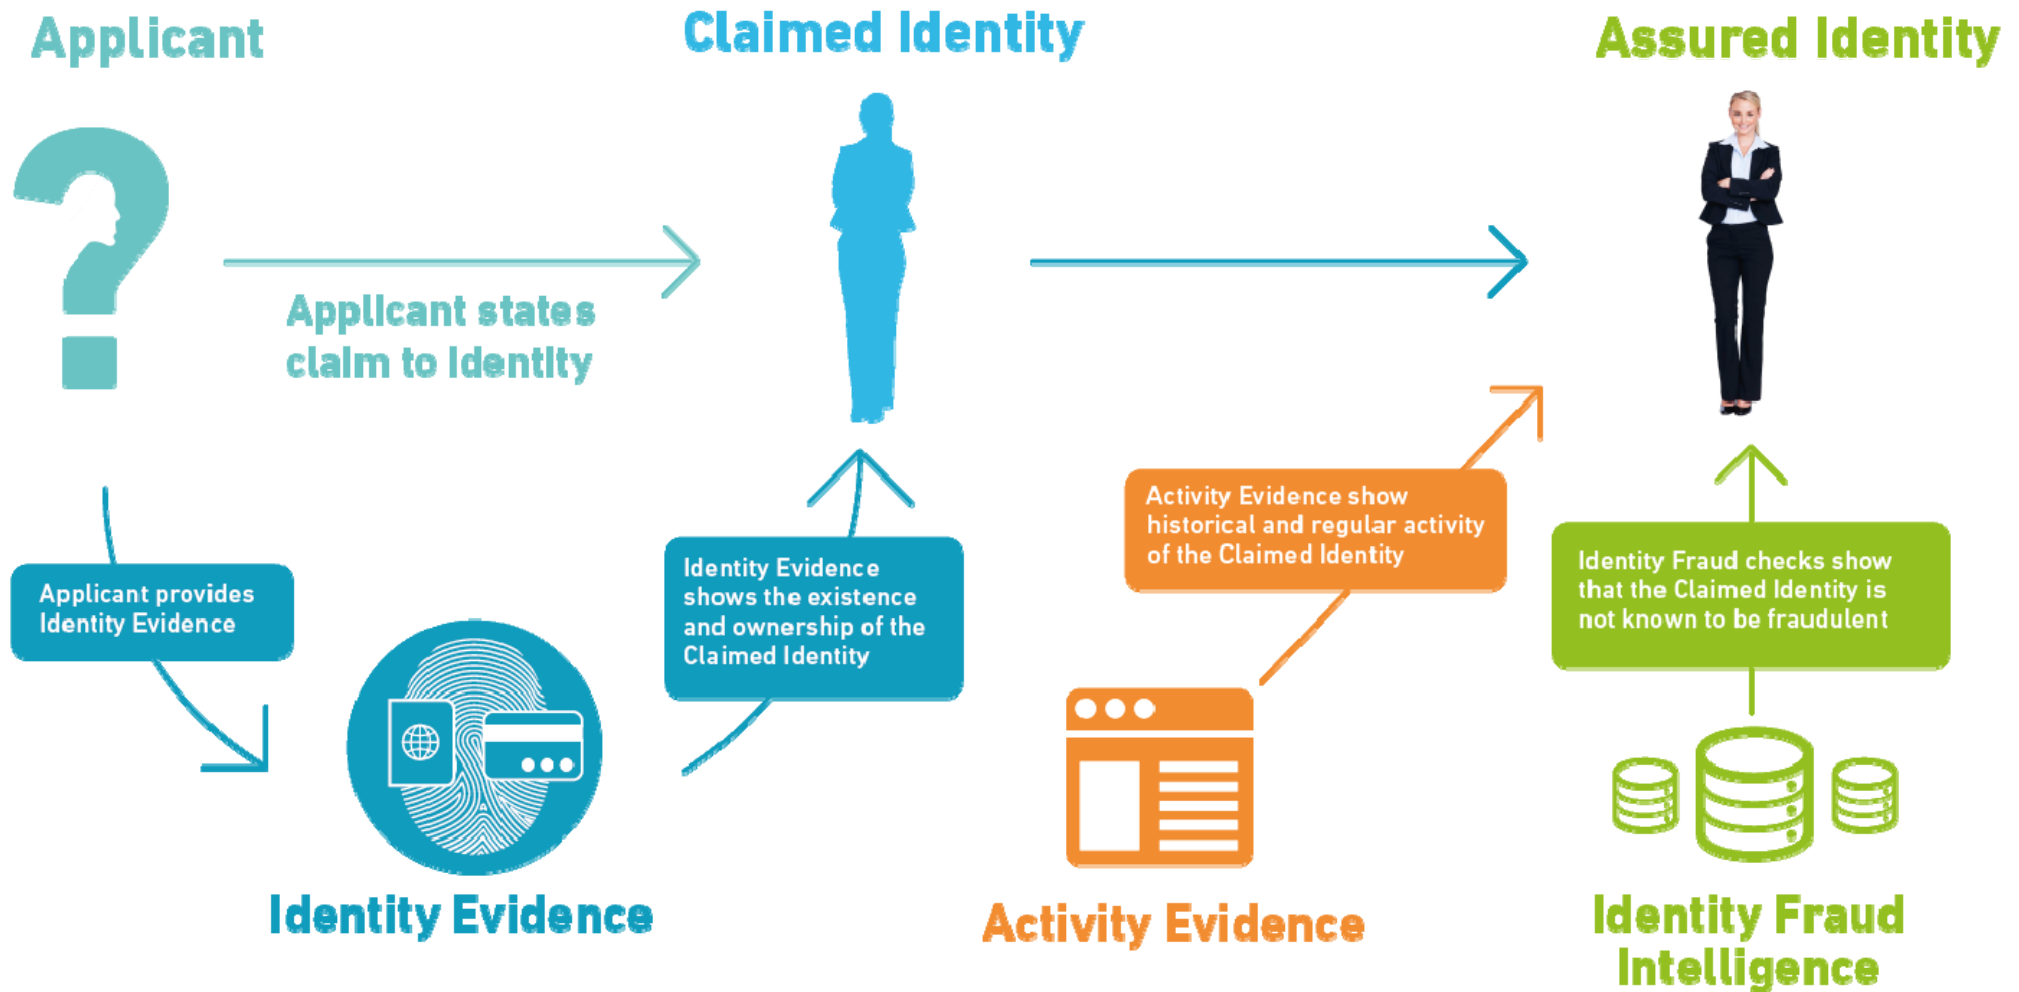

### Separates Identity Provision from Service Provision:

- Services don't need to build verification, registration or authentication solutions
- Privacy is increased as government doesn't hold identity data

### Introduces a Hub to orchestrate transactions:

- Allows Users to choose from a range of Identity Providers
- Provides a layer of abstraction between Identity Providers and Relying Party Services
- Ensures that policy for the transaction is observed
- Support for future services e.g. attribute enrichment

## Proofing and Verification

## Departments / agencies will need to:

- Decide whether identity assurance is required and if so what type / level
- Consider matching options
- Implement Integration Components

### IDA will mean departments:

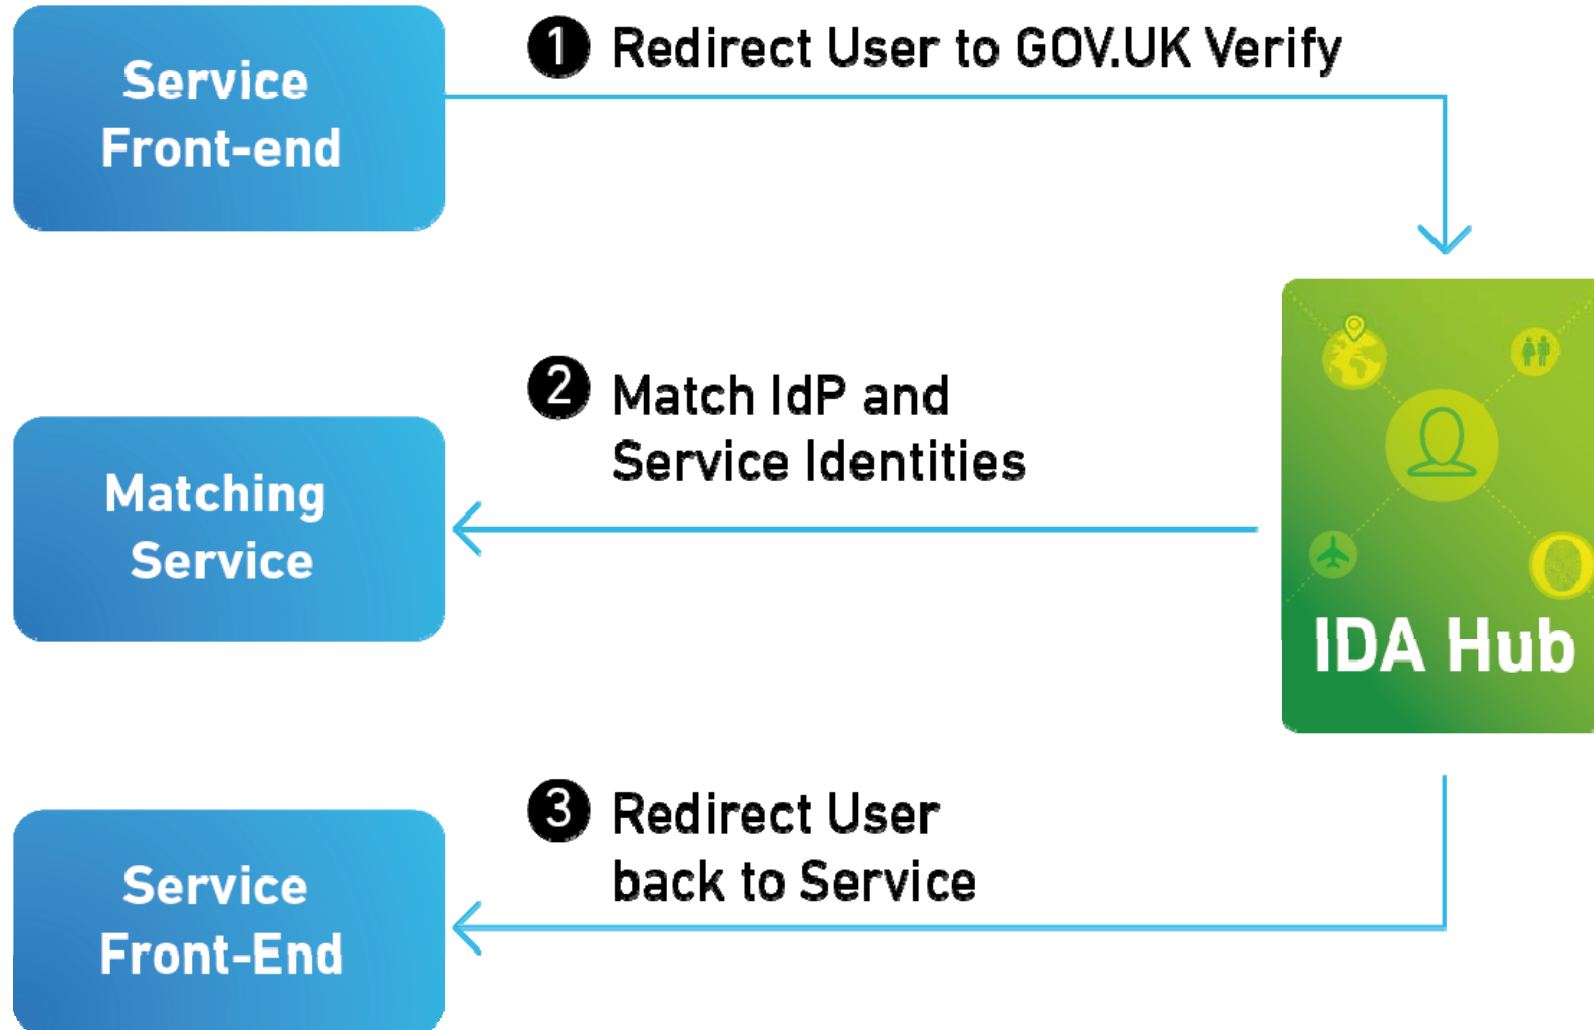

- Don't have to manage user credentials or identity proofing
- Will have access to a federated system that is secure by design, rather than a single IT solution

1. Identity Assurance
- 2. Integrating with GOV.UK Verify**
3. DVLA View Driving Licence
4. Defra Common Agricultural Policy

## Onboarding Approach

A successful IDA integration would follow these logical steps

- 1. Identify Departmental Need** – Relying services, onboarding priority and assurance level, types of users, data sources
- 2. Prepare and Cleanse Customer Data** – Aggregate, cleanse, make available for matching, federation of identities (if required)
- 3. Transition plan** – Implementation of integration points with IDA Hub and phased approach to onboarding relying services
- 4. Implement Matching logic** – Define department's rules for successful match, additional attributes to match identities reliably and securely

## Implementation Tasks

- **User-facing authentication flow**

  - Manage redirection of user's to and from the IDA Hub

  - Exchange authentication data with hub using open SAML2 standard

- **Service – Hub authentication flow**

  - Receive matching requests directly from the IDA Hub

  - Attempt to match IDA-supplied identities to service/department identities

  - Prompt IDA Hub to request additional attributes to assist matching (if required)

- **Identity Linking**

  - Implement a store to maintain links between IdP and service identities

1. Identity Assurance
2. Integrating with GOV.UK Verify
- 3. DVLA View Driving Licence**
4. Defra Common Agricultural Policy

## Why Use IDA?

- **Feedback from Public Beta**
- **Strengthen Authentication Process**
- **Add additional data to service**
- **Improve Resilience & Availability**

**BETA:** This is a trial service. Your [feedback](#) will help us to improve it.

Services

## View your driving licence

This is the first time you've used GOV.UK to access View your driving licence information.

For security, please help us verify the following details.

**Your driver licence number**

**Verify** >

 GOV.UK

**BETA:** This is a trial service. Your [feedback](#) will help us to improve it.

View Driving Record

Penalties and disqualifications

To update your details or renew your licence visit the [driver licence](#) section on GOV.UK

**MR GARETH TREVOR KITSON**

Date of birth **19 Feb 1982**

Gender **Male**

Address **120 ASHGREEN ANTRIM BT41 1EY**

**Licence details**

Driving status **You are disqualified until 18 Jun 2020**

Licence valid from **20 Sep 2009**

Licence valid to **20 Sep 2019**

Driving licence number **KITSO802192GT2BD**

Licence issue number **01**

## Benefits

- **First step to strategic authentication**
- **Re-usable matching service to link IDA to a driver record**
- **Reduce cost of authentication**
- **First step to migrate from Government Gateway**

1. Identity Assurance
2. Integrating with GOV.UK Verify
3. DVLA View Driving Licence
4. **Defra Common Agricultural Policy**

## What is CAP?

This site uses cookies. By continuing to use this site you are agreeing to our use of cookies. [Find out more about Cookies.](#)

**BETA:** This is a trial service - your feedback will help us to improve it

## CAP Information Service

This is a new service that provides information on CAP schemes and helps you manage applications, agreements and claims online. You can easily check and manage land information online throughout the year.

We are building the new online service in stages. The service provides you with a quicker, simpler and more secure way to apply for CAP schemes. Your land must be in England.

**BETA** This is a 'beta' service - find out [what this means for you.](#)

[Rural Development Schemes](#)

### Currently you can

- check and amend your personal details
- check business details
- check land details we have for the business
- give an agent, family member or others permissions to act on behalf of the business

### From January 2015 you can

- access CAP scheme information
- apply for CAP schemes
- manage applications, agreements and claims

## IDA Integration

To manage current applications, agreements and 2014 claims, continue to use existing services and associated contact details.

### **You cannot use Government Gateway to access this service.**

You need to register with GOV.UK to use this service. People you want to act on behalf of a business will also need to register.

To do this, or to sign in if you are already registered, click the button below.

## Complete personal details

You need to check all your personal details, correct them if they are wrong and complete any missing details, where required.

### About data use

Defra is the data controller for personal data you give to us or we hold about you. We use it in line with the Data Protection Act. For more information visit our Web site at [rpa.defra.gov.uk](http://rpa.defra.gov.uk) then put Personal Data into the search box.

## Personal Details

Title (optional)

Other Title (optional)

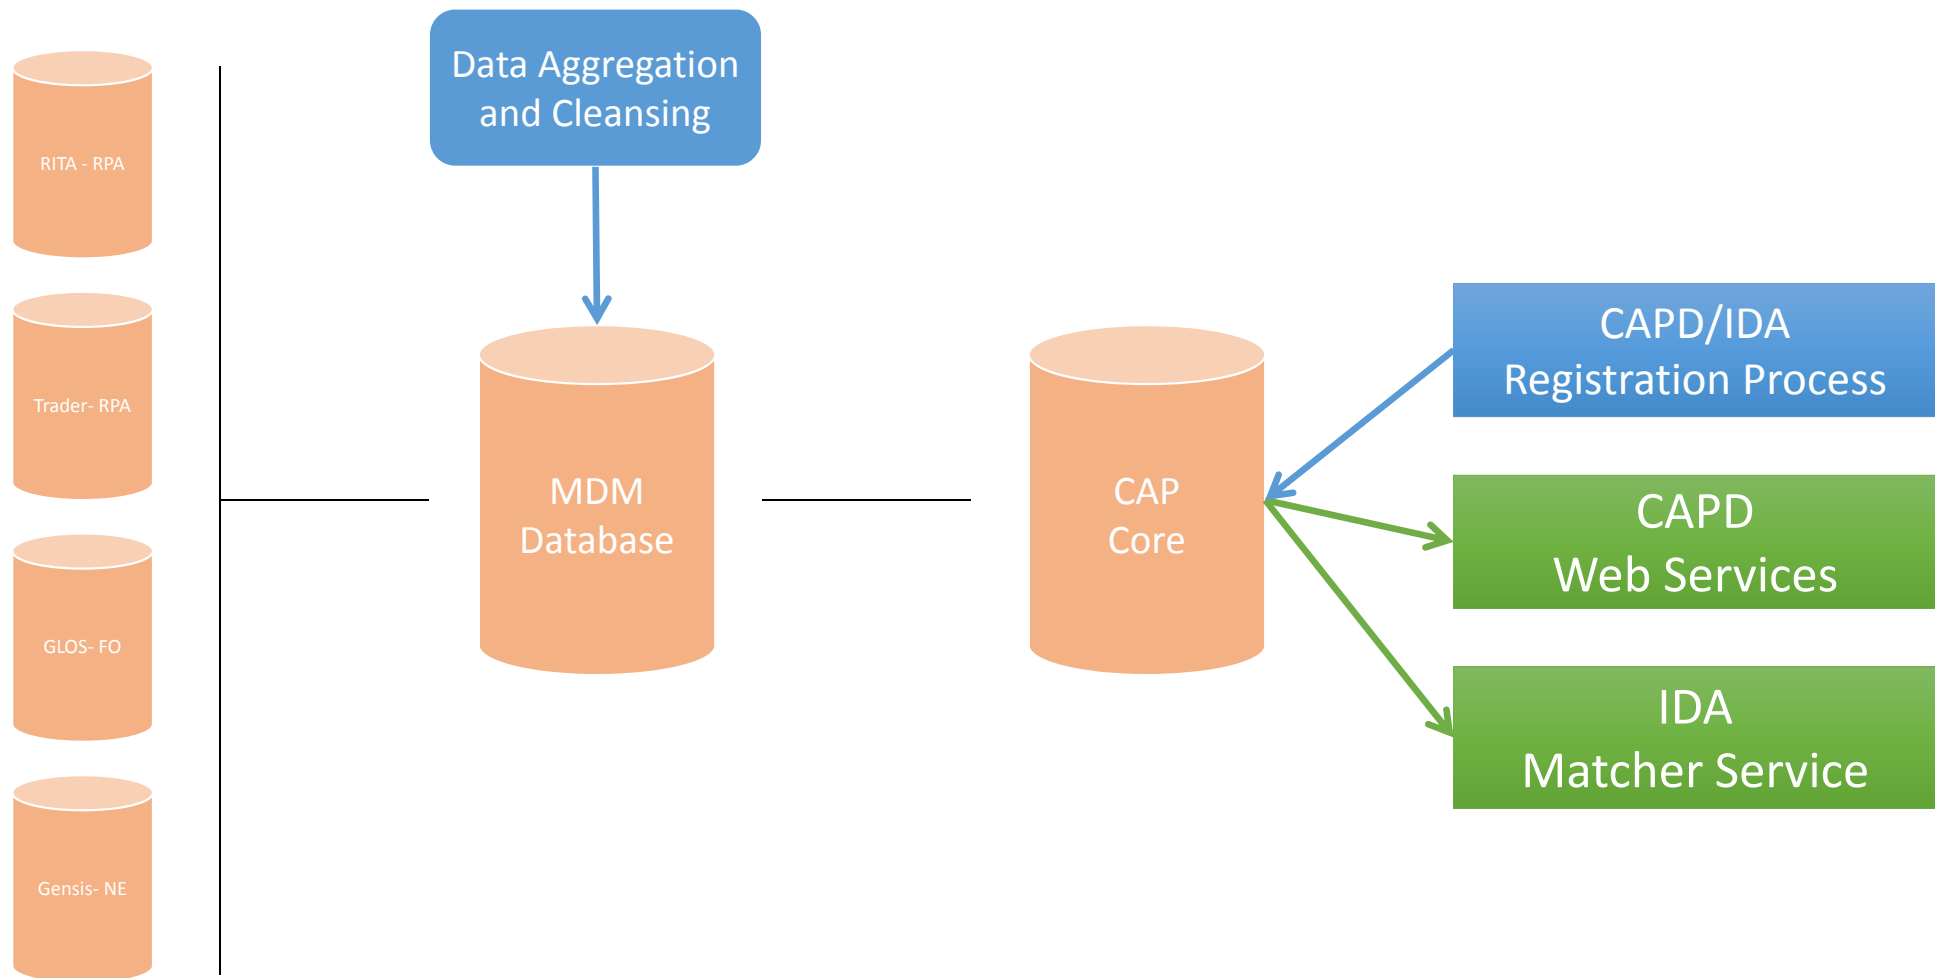

First Name

Middle Names (optional)

Last Name

Pre-populated from  
Matching Request

## Preparing for matching with customer data cleansing and linking to new golden record

## Implementation Challenges

- **Needs Analysis**

Understand types of users for your service(s), additional matching assurance, registration of users

- **Data Quality**

What data sources exist within department, how can matching be supported by this data

- **User Driven Design**

Understand the authentication flow, and how it will appear to your users

- **Fuzzy Matching**

Understanding, from business and technical view, what level of fuzziness is acceptable/possible

- **Accreditation**

Early preparation for accreditation is key, engagement with PGA throughout process
