

## Our vision

Our vision is for an empowered, connected and respected primary care system that is robust, resilient and has a thriving future. A primary care system that operates at all layers of scale, starting closest to the community and working upwards, collaborating with relevant partners to deliver the right care at the right time with the right team.

A system where there is recognition and investment in delivery models and partnerships to cultivate collective responsibility and agency for local improvements; where there is diversity of expertise and leadership to drive improvements, and increased capacity to deliver seamless integrated care. Taken together, this will enable primary care to deliver services tailored to the needs of local populations and enable health creation in communities. Our vision is built on six key pillars:
